

**Securing straps for bikes,
luggage and more**

Safety first

faigle securing straps for bikes, luggage and more

The number of bikes, trolleys and wheelchairs carried on public transport is growing all the time. More and more operators are responding to this trend by running vehicles with larger open, multi-purpose areas. Made from tried-and-tested plastic, the securing system from hanging-strap specialist faigle is the ideal solution for securing bulky personal items on public transport.

Objects such as bikes and strollers can start to roll or tip over when a bus or train pulls away, takes corners or brakes. But not with faigle's reliable strap system. It consists of a flexible plastic strap mounted on an existing fixture. Thanks to the prepunched holes, the size of the loop can be changed to suit passenger requirements.

The strap features the same material as the faigle hanging straps that are currently in use all over the world. Developed in-house, this tear-resistant, long-lasting polyurethane has excellent dimensional stability.

For public transport operators, faigle's securing straps also tick all the right boxes when it comes to aesthetics. Available in a range of colours, they can be adapted to match the customer's CI on request.

And our securing system is not just designed for trams, buses and underground trains – faigle straps can also be installed on station platforms for securing bikes, trolleys and other moveable items.

Bike strap between seats

Thanks to the prepunched holes, the size of the loop can be changed – meaning that the strap can be adjusted quickly to suit passenger requirements.

Platform straps

faigle is currently testing securing straps for station platforms: they are designed to stop bikes or wheeled suitcases rolling onto the tracks.

faigle securing straps are available in a choice of colours.

“ The requirements for public transportation are extremely wide-ranging. That means it's vital to find solutions tailored to any given situation in consultation with the customer. And that's precisely where faigle comes in: with tried-and-tested materials, years of experience, and solutions that can be flexibly integrated into various vehicle designs. ”

Gerald Boss, Global Key Account Manager, faigle
